

## Fire rated timber for exterior facade cladding and interior environments.

Fireshield® WoodSafe is a factory applied, fire rated solution used to impregnate the timber to provide fire rated Type A and Group 1-S timber surfaces. No on site fire treatment is required.

### Characteristics:

- The only timber facade fire rated system available.
- Not a coating system.
- Retains the natural look of the timber.
- Durable, never has to be reapplied
- Transportable, delivered to site for installation.

### Advantages:

- No on site application required.
- Simple, fast installation.
- Ideal for Green Building projects.
- All timbers PEFC and FSC certified.
- Leach resistant
