

# FIRESHIELD® SPECIFICATION SUPPORT PROGRAM

## GIVING YOU PEACE OF MIND ON AND OFF SITE.

A consultancy service with a suite of support tools available to specifiers of intumescent coating systems providing independent fire engineering support during the specification process, on-site during application and after application. Designed to simplify the process and coordinate between architectural + fire + structural disciplines.

### OUR PROMISE TO YOU

An independent fire engineering service which includes a formal consultancy agreement and independent indemnity insurance. In this agreement Fireshield takes responsibility for the intumescent design and specification package including:

#### OFF SITE

- Full independent fire engineering review of the project intumescent coating requirements for NZBC fire compliance
- Project and document co-ordination between the, Architect, fire engineer and structural engineer
- Issuing of a PS1 / PS4 for special design if required\*
- Complete a materials take off or loading schedule for product quantities
- Complete the specification documentation and package for the consent, tender and application process
- Professional indemnity Insurance

\*Additional fees may apply if a PS1 or PS4 is required

#### ON SITE

- Site inspections
- Applicator training
- Site specific warranty issued
- Final inspection and PS4 issued if required
